AAUL TECH AND CAREER ACADEMY

COMPUTER SUPPORT AND NETWORK SPECIALIST

COURSE DESCRIPTION

In the high tech world we live in, computer hardware and software support are two of the core competencies required for building the next generation of IT technologies. A+ Certification is an industry recognized credential that certifies the competency of PC Service Specialists. Network+ certification is an industry recognized credential that certifies the competency of candidates to install, configure and troubleshoot basic networking hardware, protocols and services. After completing this program, the student will have a working knowledge to build, repair, troubleshoot and configure a computer and its software, build the network and reduce systems-related issues within an organization. The students will learn how to configure and deploy the Windows 10 Operating System, how to manage the Windows environment and how to update and maintain Windows 10.
